

DETAILED FRONTIER TIMELINE

The following timeline represents the events of the Second Sathar War as I designed them to act as a backdrop to various campaigns I am running. I have a different timeline that runs the PCs through all the game modules in an appropriate order to progress their skill level but that is not this one. This is somewhat of a more fiction-oriented timeline rather than one specifically designed to run PCs through.

One major aspect of this timeline is that I'm using the Knight Hawks rules for interstellar travel, namely that it effectively takes 9 days to make an interstellar jump between systems (ignoring astrogation calculation times). I also make the assumption that if you're not stopping in a system, you only have to spend as much time in that system as the astrogation calculations take as you stay near jump speed during your transit. If you assume 1 day per light year per the original Alpha Dawn rules, it would change the timing of many of these events, possibly significantly.

If you're familiar with the timeline in the Zebulon's Guide to Frontier Space, you'll quickly notice that I don't follow that much at all. I pull some of the names and ideas from Zeb's Guide but the timing and actual events follow my own muse. Additionally, regardless of the source of the events, the exact dates are all my creation.

In the events that follow, I've tried to annotate the source for names, dates, and events if they come from any of the material originally published by TSR. Although I'm not going to annotate the system, planet, and common megacorp names as I assume those are common knowledge. I will also try to annotate any material coming from the Star Frontiersman and Frontier Explorer Fanzines. If you notice that I missed anything, let me know so I can fix it.

Annotations that appear at the end of an entry refer to the entire entry. If it appears in the middle, it applies just to the name that the annotation follows. Each time an annotation first appears, there will be a footnote describing it. I've also added an Appendix listing all the annotation codes. If no particular annotation is associated with an entry you may assume I made the entry up out of whole cloth or extrapolated it from other events specifically for this timeline.

SECOND SATHAR WAR TIMELINE

This part of the timeline, while it mentions the departure of the First Volturnus Expedition for reference, really starts with the departure of the Second Volturnus Expedition and proceeds through the end of the Second Sathar War. The first step will be an 8 ly jump to the OFS 224 system.
60.218	After just over a week of discussion, Discovery Squadron continues on its mission leaving the Capella system and headed toward Osak. While the Rim generally supports the mission, they are hesitant to officially contribute ships for fear of increasing sathar ire if problems arise.
60.219	Landing Day celebration held on Hentz (Athor) celebrating the anniversary of the Yazirian Exodus arriving in the Frontier region.

60.229	As Discovery Squadron is about to depart the Osak system, they are joined by two Humma-crewed vessels from Hum (Fockhrik). One is the equivalent of an assault scout, while the other is a small exploration vessel. Having heard of the mission, the humma are more than willing to take the fight to the sathar.
60.230	Strike Force Nova arrives at Hentz (Araks). No signals from OFS200 were detected on the inbound leg of the trip. The Strike Force will remain in the system for 14 days searching for signals from the system and conducting drills.
60.231	<ul style="list-style-type: none"> Repairs at the CDC starship construction center bring capacity up to 75%.

FY	Event
	<ul style="list-style-type: none"> A sudden and serious storm swirls around the summit of Mt. Spire requiring the Spire Dragons expedition to hunker down less than 1000m from the summit to wait out the storm. They dig in but are very exposed near the mountain's peak
60.232	With repairs of the CDC starship construction center well underway and progressing, work on the CDCSS Mystic resumes
60.233	<ul style="list-style-type: none"> After two days, the storm atop Mt. Spire finally clears. Four expedition members were lost during the storm, their shelters having blown away, presumably carrying them with it. The remaining team makes the final ascent reaching the summit about two hours after noon. The team reaching the summit consisted of members of all seven Frontier and Rim races, although there was only one Osakar as the other two Osakar that were part of the summit team were lost in the storm. With another storm rapidly approaching, they take pictures and quickly begin their descent.
60.234	Construction of an assault scout for Trans Travel begins in the Minotaur (Theseus) shipyards
60.235	The CSCSS Trucker XIV arrives at Alcazzar (Rhianna) and begins shuttling crew and equipment to the surface. Cold conditions slow the initial construction while crews wait for slightly warmer weather.
60.236	The HSS History's Hope successfully completes the return jump to the Scree Fron system fully charting the route to that system. They dock at Histran station to resupply and report the jump to the UPF. The proceeds from the jump registration will be used to help fund the mission.
60.237	The Spire Dragon summit team makes it safely back to their high-altitude base camp just hours before the new storm hits.
60.238	Discovery Squadron arrives at Stenmar (Kazak). This is their last stop in known space and the squadron will spend a week here making sure the ships are fully repaired and stocked for their journey.
60.239	Work begins by the Discovery Squadron astrogators to plot the first new jump route of their trip. Their destination is the star system OFS19, five light years away just above the jump route to the Cryxia system.
60.240	Resupplied, the HSS History's Hope leaves Histran Station (Scree Fron) to return to the OFS224 system and then begin charting the next new jump in its journey.

60.244	Having made no detections of signals from OFS200, Strike Force Nova departs Hentz (Araks) for the Scree Fron system.
60.245	After over thirty days in the Kizk-Kar system with no further sign of sathar ships, the assault scouts from Kaken-Kar and Fromeltar begin their return trips to their respective systems.
60.246	Discovery squadron begins accelerating toward Void speed on its first jump out the Frontier and Rim region of space.
60.247	Investigations into the source of Ixiol have definitively linked it to Malco Enterprises on Outer Reach (Dramune). Unfortunately, the UPF charter prevents any direct action against the operation without express consent of the planetary government which denies the allegations.

FY	Event
60.248	Based on the findings regarding Ixiol production on Outer Reach (Dramune), Inner Reach (Dramune) implements a strong inspection policy against any ship coming from Outer Reach to search and inspect all cargo from that planet before it can be delivered on Inner Reach.
60.249	HSS History's Hope arrives safely in the OFS224 system. Work begins to chart a jump to the neutron star in the OFS221 system, a jump of 7 light years.

60.251	Discovery Squadron successfully jumps to the OFS19 system, a small M1 red dwarf star.
60.252	<ul style="list-style-type: none"> • After a day of deceleration into the OFS19 system, the Discovery Squadron detect radio signals from the direction of one of the inner planets. They appear to be sathar in origin. Subspace radio messages are dispatched back to the Frontier and Rim. • The squadron immediately changes vector to not be decelerating directly toward the inner system and the astrogators begin working on calculations for a return jump to Kazak.
60.253	After a day of collecting signals in the OFS19 system, at least 10 different sathar ships have been detected by Discovery squadron. Composition is unknown.
60.254	<ul style="list-style-type: none"> • Strike Force Nova arrives at Histran (Screen Fron). Two new ships have been identified but four have gone silent.
60.255	<ul style="list-style-type: none"> • The militia assault scouts that had been deployed to the Kaken-Kar system arrive back at their home systems. The crews are given some needed shore leave. • Calculations complete for the return jump to Kazak, and apparently detected by the sathar vessels, Discovery Squadron begins a hard acceleration to stop and reverse direction for a jump out of the system.
60.256	Discovery Squadron completes the stopping maneuver and begins acceleration out of the system. The sathar vessels are nearly half-way to their position and have a sizable speed advantage. It is questionable if the squadron can reach jump speed before the sathar ships catch them.
60.257	With a known path, the Spire Dragons team make it back to their camp at the base of the mountain after only fourteen days of hiking. All that is left to complete their expedition is to make it back to the coast.
60.258	<ul style="list-style-type: none"> • After two days of grueling high-g acceleration, Discovery Squadron manages to enter the Void for the jump back to Kazak just hours before the sathar vessels overtake them. Unfortunately, due to the haste of their departure, the Discovery Squadron, misjumps into a binary star system rather than Kazak. • Prior to their jump, the Discovery Squadron identify the sathar vessels as 1 heavy cruiser, 1 assault carrier, 1 light cruiser, 2 destroyers, 1 frigate, and 2 ships of a new design approximately the size of the Streel corvettes.
60.259	The HSS History's Hope jumps into the OFS221 system. While they arrive much further out in the system than planned, the jump is considered a success. They will spend a week in the system studying the neutron star before returning to OFS224.
60.260	After two days of rest from the grueling jump and observations by the astrogators, the Discovery Squadron determines that it is in FS50 system between Kazak and Osak, having

	overshot their target. Work begins on calculating a jump back to the Kazak system just 4 light years away.
60.261	With preliminary jump calculations done and the crew mostly recovered from their days of high-g acceleration, Discovery Squadron begins accelerating toward jump speed for their return to Kazak.
60.262	<ul style="list-style-type: none"> • While they don't know if the UPF ships detected the starship construction center in OFS19, the sathar high command decide to shift some of the assets there to increase the defenses. • Four destroyers from the Liberty system are dispatched to OFS19. Even with a high-speed traversal of the jump routes, this will take approximately 80 days. • A frigate, light cruiser, assault carrier, and eight fighters are dispatched from the sathar SCC#4 (OFS111) to reinforce OFS19 as well. Much closer, it is only a 20-day trip.
60.263	The new assault scout arrives in the K'aken Kar system. After a brief checkout, it takes up regular patrol duties.
60.264	The third saurian Ark ship is completed and begins its shakedown cruise.
60.265	<ul style="list-style-type: none"> • Strike Force Nova departs Hasokar (Screen Fron) to return to Araks. No signals from OFS200 were detected while in the system. • Discovery Squadron successfully jumps back to the Kazak system. They immediately begin broadcasting the details of their findings in the OFS19 system to both Rim and UPF contacts.
60.266	With receipt of the information about the sathar forces in OFS19, both Spacefleet and the Flight begin discussions on how best to deal with the sathar presence. While discussions are occurring, the Flight dispatches several ships to both Cryxia and Kazak.
60.267	HSS History's Hope begins accelerating to return to OFS224 and chart the return leg of the jump connection the OFS221 and OFS224 systems.

60.270	Discovery Squadron arrives at Stenmar Station where most of the crew takes a week of shore leave.
60.271	The sathar starship construction center in the Liberty system completes a destroyer and 6 fighters.
60.272	Errors in the astrogation calculations cause the HSS History's Hope to misjump and not return to the OFS224 system. Luckily, they end up in the Araks system. While not disastrous, the misjump emphasizes for the crew the risk involved in their endeavor.
60.273	Deciding not to risk trouble with the Family of One authorities on Hentz (Araks), the HSS History's Hope decides to not stop at the station and head straight back to Histran (Screen Fron)
60.274	Businesses on both Inner and Outer Reach (Dramune) lodge formal complaints against the new inspection of cargo arriving at Inner Reach from Outer Reach claiming it is hurting trade and damaging business. The government refuses to make any changes to the process.
60.275	Strike Force Nova arrives at Hentz (Araks). It will spend just 4 days here before heading on to the Athor system.
60.276	A new assault carrier is completed in the sathar starship construction center near Fromeltar.

FY	Event
60.277	After 20 days backtracking though their original path, the Spire Dragons reach their coastal camp. All told it took just over half a year (202 days) to make the full trek and cost the lives of fifteen of the team's members.
60.278	<ul style="list-style-type: none"> • Newest saurian Ark ship completes its checkout and passengers begin shuttling to the ship. • In order to avoid OFS019 and the sathar forces there, the Discovery Squadron decides to try skirting the edge of the nebula near Kazak and jump to the double star system OFS017.
60.279	Strike Force Nova departs Hentz (Araks) for the Athor system
60.280	After four weeks of the increased inspections of ships arriving at Inner Reach (Dramune) from Outer Reach (Dramune), authorities have seized millions of credits worth of the drug Ixiol and reported cases of the drugs use on the planet has dropped significantly.
60.281	As news of Inner Reach's (Dramune) success on limited the import of Ixiol spreads around the Frontier, other systems consider similar sanctions. However, many of the systems lack the militia enforcement necessary to make it successful.
60.282	<ul style="list-style-type: none"> • A heavy cruiser is completed in the sathar starship construction center near Zebulon (OFS19). • The frigate, light cruiser, assault carrier, and fighters arrive in OFS19 from OFS111. The forces in the system are now on par with, if not exceeding, the strength of any of the UPF Task Forces. • Mistakes in the astrogation calculations, possibly due to the presence of the nebula, send the Discovery Squadron off course and they end up in a single star system instead of the binary system they were shooting for.
60.283	The HSS History's Hope arrives safely at Histran Station (Scree Fron) where it will resupply before reattempting to complete charting the jump route between OFS224 and OFS221.
60.284	Construction on the second K'aken-Kar militia assault scout begins.
60.285	<ul style="list-style-type: none"> • After three days of observations, the astrogators of Discovery Squadron determine that they are in OFS025 instead of OFS017, having jumped further than intended. No sathar signals have been detected. • After much discussion, the decision is made for Discovery Squadron to press on. They prepare to jump to OFS026 which would have been the next system after OFS017.
60.286	The HSS History's Hope departs Histran Station (Scree Fron) headed to OFS224 to resume its attempt to chart a course to the suspected Yazirian home system.
60.287	PGC shipyards around Gran Quivera attacked by militants claiming to be Streeel supporters, using access derived from the Nesmith Enterprises breach earlier in the year. Production capacity reduced by 38%. Several hulls destroyed but the Spacefleet battleship escaped unscathed.
60.288	Strike Force Nova arrives in the Athor system. Originally scheduled to spend seven days in the system, the news from the Discovery Squadron cut that short to only 2 days.
60.289	Strike Force Nova detects extremely faint signals from OFS200 in the Athor system. The detection confirms that the signals have been being broadcast for years undetected.
60.290	Strike Force Nova departs the Athor system to return to Preglar.
60.291	Construction of two TransTravel assault scouts completed at the CDC starship construction center orbiting Triad (Cassidine) and begin traveling to Terldrom (Fromeltar).
